PRODUCT DESCRIPTION

The H110-TF heat recovery ventilator produces approximately **95 CFM** at 0.20 in.w.g (ESP) and recovers heat through its high-efficiency polypropylene core. The H110-TF has been thoughtfully engineered for simple installation in apartments, condos, and small houses. The removable collars are topmounted, which makes the unit both narrow and shallow enough to fit inside standard closets and other tight spaces.

The H110-TF has two exclusive features. EvacMAX™ provides on-demand boost for maximum ventilation. With FLEXControl, airflow circuits can be calibrated electronically, eliminating the need for resistance-inducing balancing dampers and improving overall efficiency.

KEY FEATURES

- Electronically and independently adjustable supply and exhaust blowers (FLEXControl)
- Gauge ports on the door for fast and reliable airflow readings
- Twist-in collars for easy flex-duct attachment
- Non-dust-loading backward-inclined impellers on totally enclosed motors
- Easy access to core and filters for cleaning
- Extremely durable polypropylene core
- · Optinal high efficiency filters
- Multiple low-cost controller options
- Automatic exhaust defrost protects the core from frost build-up
