HOW TO USE THE ALGRILLE

The center adjustment cone allows for variable ventilation capacity.

After installing your Algrille vents and connecting them to the ductwork from your ventilator, begin balancing the ventilation ports by increasing openings on the most distant Algrille until the flow is satisfactory throughout the building. Usually two rounds of balancing will provide the desired air distribution.

INSTALLATION

Compression-spring tab clips the Algrille into 4", 5", 6", or 8" round duct.

Foam for tight seal and sound attenuation.
