 & TECHNICAL  
 DATA

duct system design or installation, thermal stack effect, building pressure, dust-clogged filters, etc. The register box and CAR-II combination provides a low-cost solution to balancing ventilation and exhaust systems, essentially eliminating the need for on-site balancing. Automatic flow regulation is achieved without the use of electric or pneumatic sensors or controls.

The active control element of the CAR-II is a unique aerofoil. Using Bernoulli's Principle, the aero-wing damper lifts in response to increasing static pressure. This operation regulates the free-area opening through the control, maintaining velocity and specific airflow set points. Each CAR-II is designed and produced for control of air in temperatures ranging from -25° to 140°F (-32° to 60°C.)

**DESCRIPTION**

RB-WB Register Boxes are designed for installation in wall assemblies. Each RB-WB is specifically designed to accommodate an automatic, self-regulating constant airflow regulator (CAR-II), which is sold separately. The RB-WB includes mounting brackets, integral drywall flanges, and nine-hole screw-catch pattern for simple grille mounting. Optional flush-mount steel grilles are also available.

When used with a CAR-II, the passive control element in each CAR-II compensates for changes in duct pressure caused by

**CONSTRUCTION**

The RB-WB is constructed of heavy-gauge galvanized steel with an extended duct collar that allows attachment of flexible or rigid duct.

**ORDERING**

To order register boxes with Aldes Constant Airflow Regulators (CAR-II), see specification sheets for CERB-WB-II (exhaust or return air) or CSRB-WB-II (supply air). Models RB-WB do not include Constant Airflow Regulators (CAR-II).

**RB-WB Dimensions**

PART NUMBER	DUCT COLLAR*	A	B	C	D	E
54 003	3"	8"	4"	3-3/8"	5-3/4"	2-7/8"
54 014	4"	6"	6"	5-1/2"	6"	3-7/8"
54 016	5"	6"	6"	5-1/2"	6"	4-7/8"

\* 3" Duct Collar fits 2" x 4" walls; 4" and 5" Duct Collars fit 2" x 6" walls
