

# MAKE-UP AIR SOLUTIONS AIRLET™ TL98 Manually Adjustable Fresh Air Inlet

PRODUCT  
SPECIFICATIONS  
& TECHNICAL  
DATA

## DESCRIPTION

The AIRLET™ TL98 manually adjustable fresh air inlet incorporates a unique, variable, precision-control damper that provides superior comfort control for the user. The damper is manually adjusted using a discreet slide control accessible from behind the front cover, which prevents unwanted tampering.

The interior grille is both attractive and multi-functional. The slightly arched grille face and horizontal lower slot take advantage of air currents to provide condensation protection. The superior air-distribution pattern ensures draft-free performance.

Every AIRLET™ TL98 includes an expandable wall sleeve, an exterior louver, and a permanent, washable filter that is easily accessible for cleaning. The white color blends well with any decor, and the unit can be cleaned with a damp cloth. Pollen filters and sound-absorbing wall sleeves are also available.
