E1100L-Fi-EC & E1100L-Ri-EC

The E1100L-Fi-EC and E1100L-Ri-EC energy recovery ventilators provide up to 1175 CFM of fresh outdoor air while exhausting stale indoor air. The units make use of Aldes' AHRI Certified High Latent Transfer enthalpic cores that deliver superior moisture transfer and can be used in any climate zone. The highly efficient and quiet EC motors use on average 50-75% less electricity than typical PSC motors, significantly increasing return on investment.

The E1100L-Fi-EC and E1100L-Ri-EC is recommended for smaller non-residential spaces or dedicated zones within larger buildings, such as classrooms, common areas of residential complexes and indoor parking garages.

Designed for versatile indoor installation, Aldes light commercial ventilators can fit almost anywhere and still provide easy access to the internal components with removable access doors on both sides. The units also offer a choice of five continuous operation speeds and ademand-controlled high-speed exchange mode.
