Ventergy® Series Fans

Aldes Ventergy® Series Fans are the perfect combination of ventilation performance, energy efficiency, and application flexibility. Whether they are used for whole-house IAQ ventilation or targeted exhaust ventilation, each model is engineered to be the highest performing ventilator available. Most Ventergy® Series models are ENERGY STAR certified, which means they represent the best airflow-to-power ratio of any fan in the industry. Ventergy® Series continuous-duty rated fans are ideal for homes, apartments, and general purpose use in any climate or region.

FEATURES

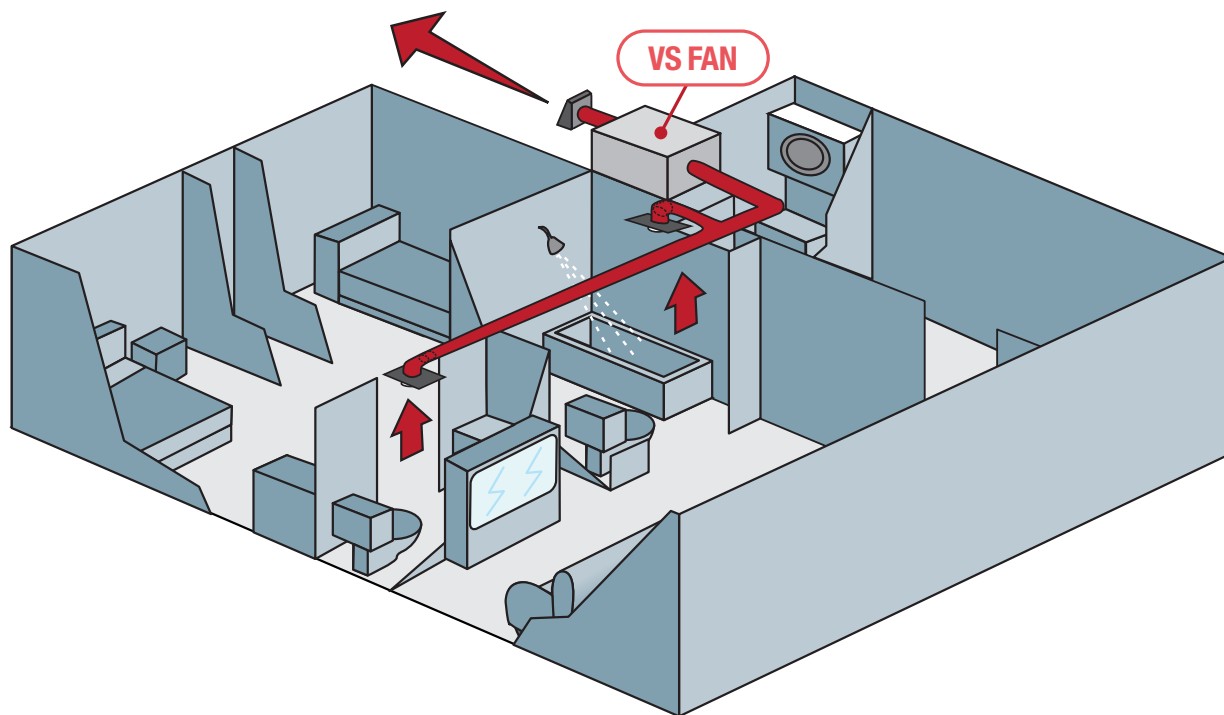

Ventergy® Series In-line Ventilator Fans represent years of engineering development to combine the energy efficiency and sound performance of a forward-curved fan with the durability and pressure characteristics of a backward-inclined impeller fan.

VS SERIES

Ventergy® Series VS Series In-line Ventilators are a superb choice for exhausting stale air from bathrooms, kitchens, laundry rooms, and garages. These fans are powerful enough to exhaust two rooms yet small enough to fit in tight spaces. By design, VS fans are exceptionally quiet, and they can be remote-mounted to ensure that occupants perceive no noise during fan operation.

Models VS4, VS6, and VS6 MAX meet ENERGY STAR efficiency criteria for low energy consumption.

ELECTRICAL DATA

VS4: 115 V, 60 Hz, 20 W, 0.17 A, 2324 RPM
 VS4 MAX: 115 V, 60 Hz, 34 W, 0.29 A, 3135 RPM
 VS6: 115 V, 60 Hz, 41 W, 0.34 A, 2200 RPM
 VS6 MAX: 115 V, 60 Hz, 59 W, 0.53 A, 2960 RPM

*Above ratings are intended for sizing electrical wiring only.
 Actual consumption will be lower.*

FEATURES

- For intermittent or continuous use
- Low power consumption
- Condensation-proof IAQ lined cabinet
- Whisper-quiet operation
- Compact dimensions
- Ideal for zoning applications
- 100% speed controllable
- Easy-to-access motor / impeller

Drop-down hinged motor and filter access
panels for easy service

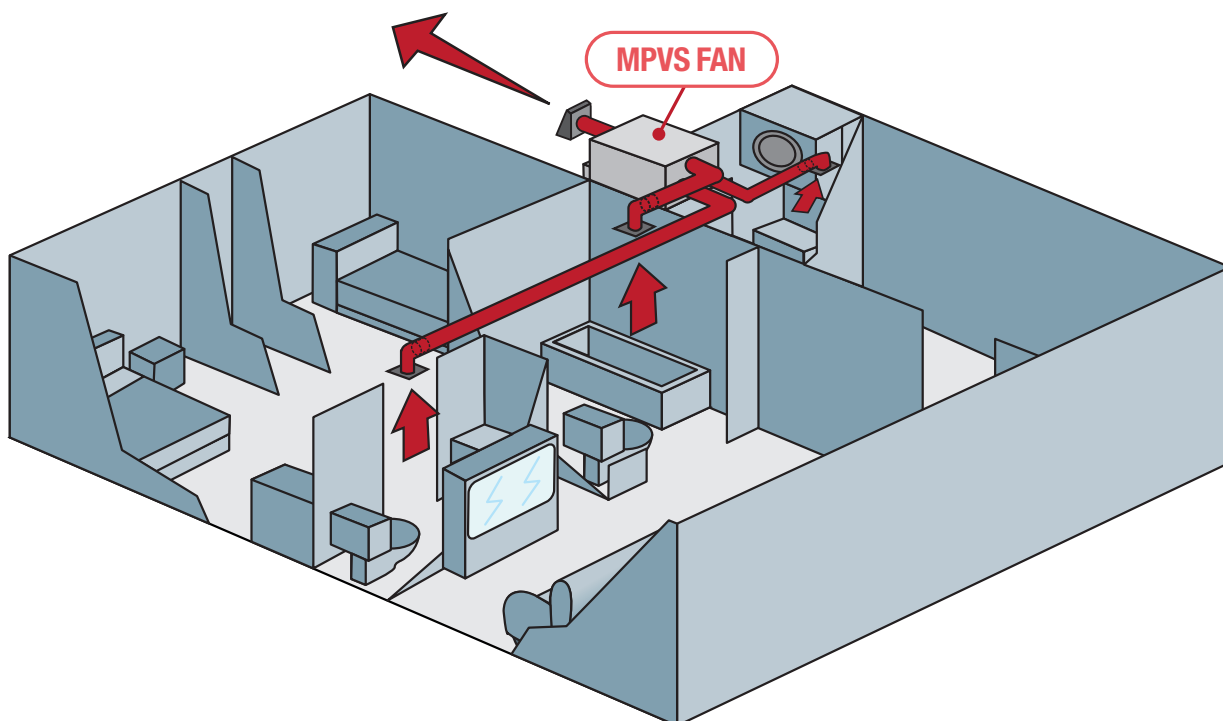

VENTERGY® SERIES FANS

MPVS100 & MPVS120: MULTI-PORT EXHAUST VENTILATORS

MPVS100 & MPVS120

Ventergy® Series Multi-Port Ventilators (MPVS) can be used for central, continuous exhaust ventilation of bathrooms, kitchens, laundry rooms, and other rooms where humidity is a controlling factor. Unlike traditional bathroom fans that clutter the roofline with penetrations, these fans have a single exhaust discharge duct. Exhaust air can be drawn from two-to-four spaces using just one MPVS fan. Their compact, in-line design allows for remote mounting and supremely quiet performance.

The MPVS100 meets ENERGY STAR efficiency criteria for low energy consumption.

**ELECTRICAL DATA**

MPVS100: 115 V, 60 Hz, 21 W, 0.19 A, 2500 RPM

MPVS120: 115 V, 60 Hz, 34 W, 0.29 A, 3135 RPM

*Above ratings are intended for sizing electrical wiring only.
Actual consumption will be lower.*

FEATURES

- Low power consumption
- Condensation-proof IAQ lined cabinet
- Whisper-quiet operation
- Compact dimensions
- Single exterior penetration
- Easy-to-access motor / impeller

NOTE: If duct runs longer than permitted in the table above are required, use smooth ducting and/or increase the diameter.

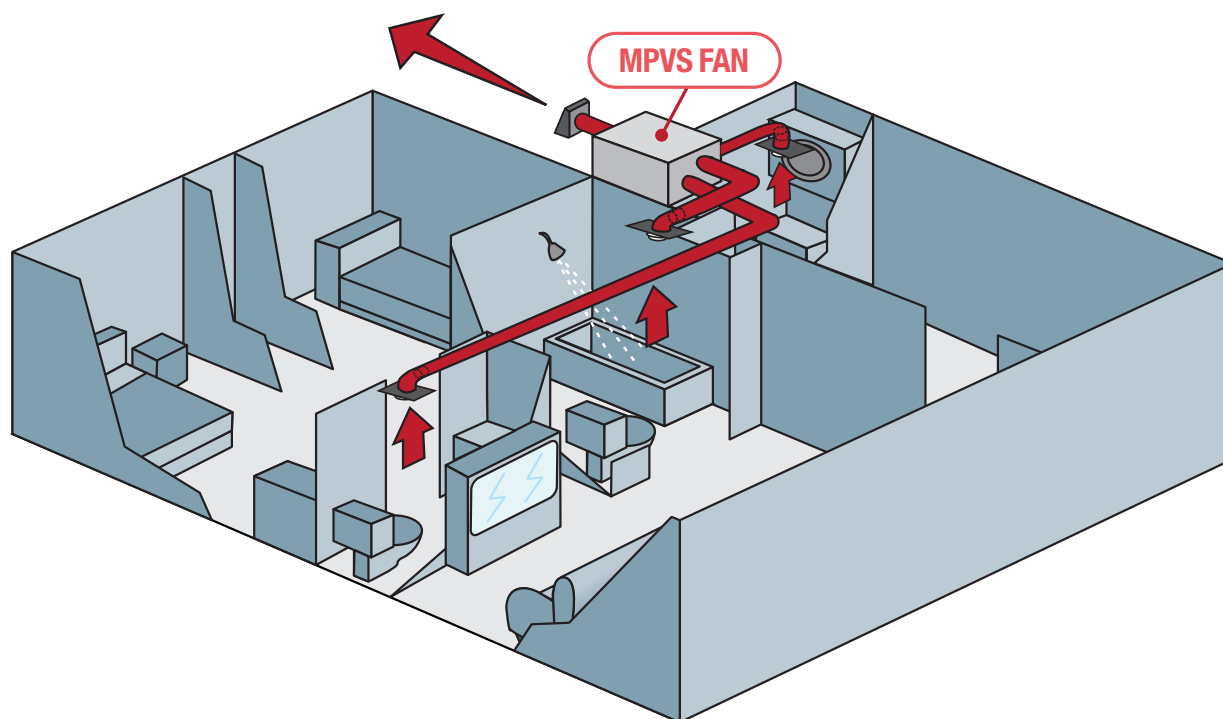

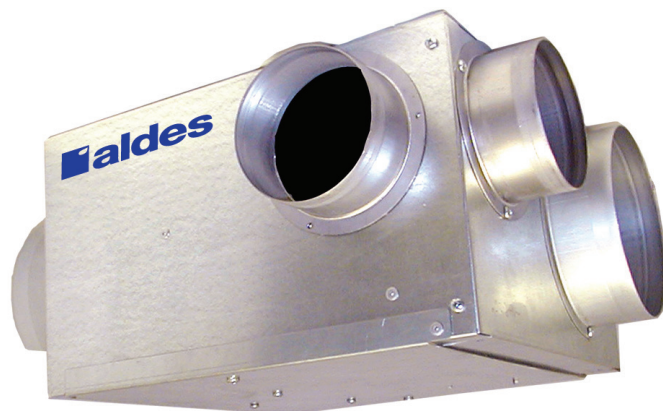

VENTERGY® SERIES FANS

MPVS150 & MPVS200: MULTI-PORT EXHAUST VENTILATORS

MPVS150 & MPVS200

Ventergy® Series Multi-Port Ventilators (MPVS) can be used for central, continuous exhaust ventilation of bathrooms, kitchens, laundry rooms, and other rooms where humidity is a controlling factor. The multi-port design, coupled with powerful-yet-efficient motors, allows a single MPVS fan to quietly exhaust two-to-four spaces. By eliminating the need for multiple exhaust fans, the MPVS makes it possible to have a single exterior exhaust penetration.

The MPVS150 and the MPVS200 meet ENERGY STAR efficiency criteria for low energy consumption.

**ELECTRICAL DATA**

MPVS150: 115 V, 60 Hz, 41 W, 0.34 A, 2200 RPM

MPVS200: 115 V, 60 Hz, 59 W, 0.53 A, 2960 RPM

*Above ratings are intended for sizing electrical wiring only.
Actual consumption will be lower.*

FEATURES

- ENERGY STAR Certified
- Low power consumption
- Condensation-proof IAQ lined cabinet
- Whisper-quiet operation

*This table should only be used as a general guide. Actual duct length allowances may be longer on some models. Contact the factory for assistance.

NOTE: 3" Ducting may be substituted to permit installation in partition walls. Smaller diameter ducting has increased resistance to airflow. For each foot of 3" ducting substituted for 4" diameter duct, reduce the allowable duct length by 3 feet. If duct runs longer than permitted in the table above are required, use smooth ducting and/or increase the diameter.

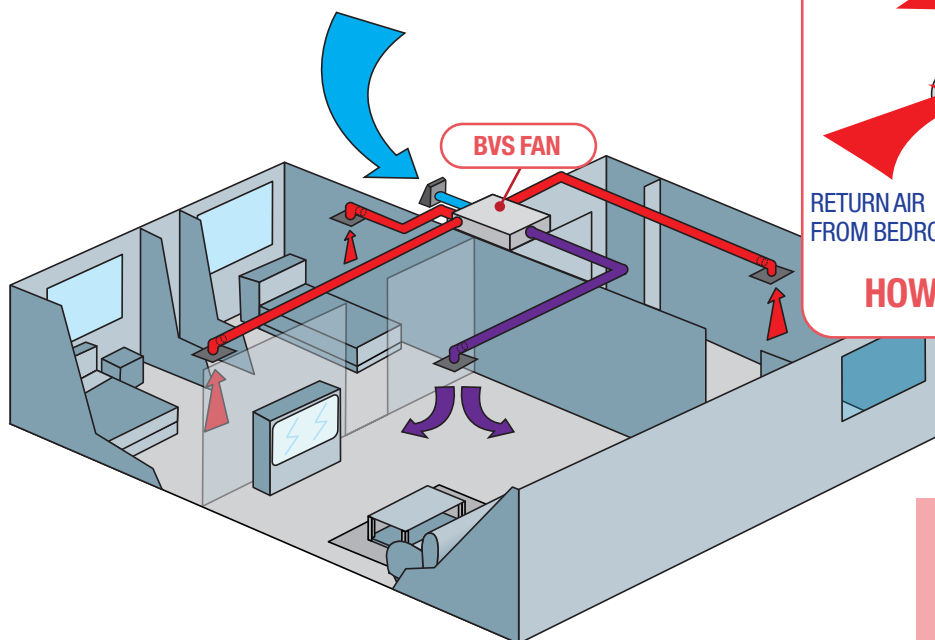

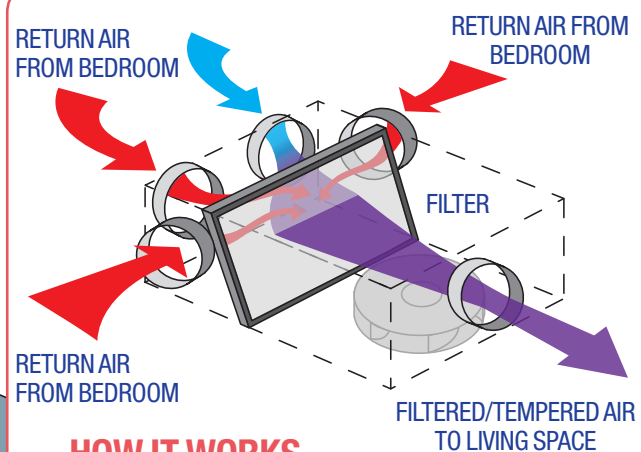

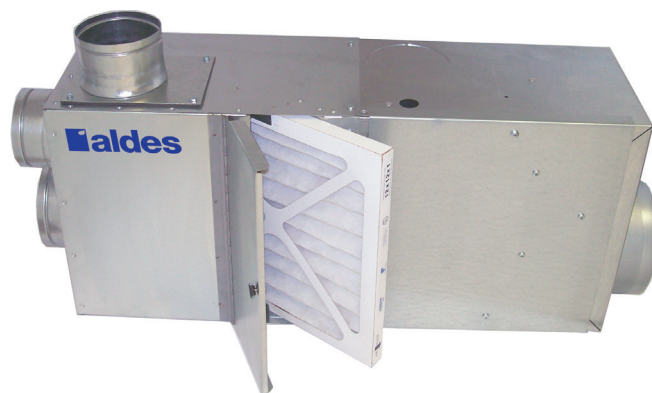

NOTE: Location(s) of field-installed 4" side-tap collar(s) shown as dashed lines.

BVS120 & BVS200

Ventergy® Series Blending/Filtering Ventilators (BVS) are great solutions for bringing fresh air into tightly constructed homes. As outside air enters the BVS, it mixes with return air from up to five bedrooms or other areas that are typically not served by a central thermostat. The resulting tempered air passes through a filter before being distributed to living areas. The BVS is an efficient way to enhance thermal comfort. By slightly pressurizing the structure, the BVS prevents the introduction of contaminants and reduces the risk of backdrafting heating appliances, water heaters, and fireplaces.

The BVS120 and BVS200 meet ENERGY STAR efficiency criteria for low energy consumption.

**ELECTRICAL DATA**

BVS120: 115 V, 60 Hz, 41 W, 0.34 A, 2200 RPM
 BVS200: 115 V, 60 Hz, 59 W, 0.53 A, 2960 RPM

MAINTENANCE

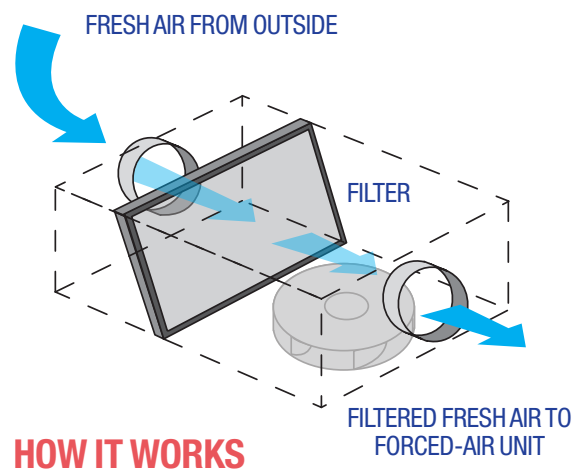

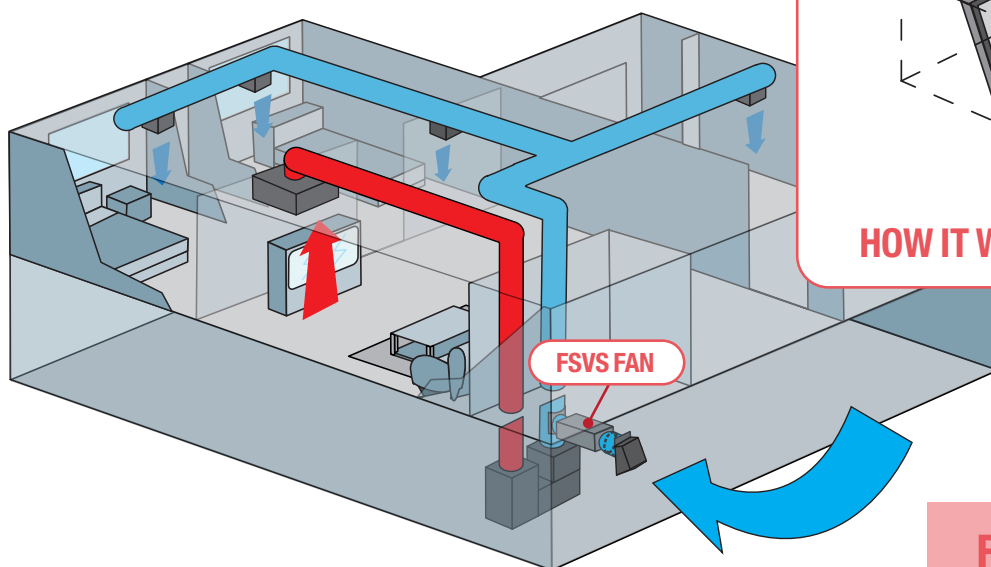

Monthly: Clean the exhaust and
supply grilles.

Seasonally: Clean the fresh air intake
wall hood.

FSVS140

Ventergy® Series Filtering Supply Air Ventilators (FSVS) are designed to provide precise amounts of outdoor air to the occupied space. Fresh air passes through a filter before being distributed, either via the supply stream of a forced-air unit, or through an overhead return in the main living area. The low-volume fresh air provided by the FSVS140 keeps indoor air quality high, and the space stays positively pressurized to avoid backdrafts and unwanted infiltration.

The FSVS140 meets ENERGY STAR efficiency criteria for low energy consumption.

FEATURES

- Low power consumption
- ENERGY STAR Certified
- Condensation-proof IAQ lined cabinet
- Whisper-quiet operation
- Compact dimensions
- 100% speed controllable
- Easy-to-access filter / motor / impeller
- Multiple filter options

ALTERNATIVE INSTALLATION FOR NON-AHU FAN INTERLOCK CONTROL

For continuous operation, the FSVS should be installed separately from the forced A/C system to prevent moisture in the air from condensing inside cold ducts, or cold air coming in contact with the heat exchanger.

◀ **Example:** Installed so fresh air is introduced into the large living area via the overhead return.

Engineering tomorrow's solutions is more than an idea – it is a guiding principle. Every Aldes product is equal parts innovation and experience. Efficient and respectful solutions of the environment which allow to renew and purify the indoor air delivering improved air quality. From automatic airflow controls to advanced heat and energy recovery ventilators, Aldes products can be found in high-performing homes, schools, hotels and buildings across North America. Healthy Living, much more than a movement, embody our benevolence, our sense of responsibility and pioneering spirit.
