

1. AIRFLOW SETTING

Airflow rate can be set or adjusted by rotating the dial from either side. The airflow indicator will move to show the selected CFM. The airflow label has multiple defined setpoints, but the unique adjustment mechanism of the CAR3 allows for infinite adjustability between the minimum and maximum limits. Performance charts found in the specifications sheet reflect this data, with the available range (shaded) and marked setpoints (lines). The CAR3 will maintain the airflow accurately to within +/- 10% of the indicated lines below for each marked setpoint. At the higher airflow rates, the minimum pressure required to achieve the selected airflow may exceed 0.12 in. w.g.

Each diameter has a unique range for both low- and high-pressure variants. The CAR3-L (low-pressure) is designed for systems with pressures between 0.12 and 1.2 in. w.g. (30 to 300 Pa), and CAR3-H (high-pressure) between 0.4 and 2.8 in. w.g. (100 to 700 Pa). Factory calibration of the CAR3 is available on request. Blue color dial = Low-Pressure / Green color dial = High-Pressure.

2. DIMENSIONS

SIZE	А	ØB	ØC
4″	3″	3.8″	4.1″
(100 mm)	(78 mm)	(97 mm)	(104 mm)
5″	3.8″	4.8″	5.2″
(125 mm)	(97 mm)	(121 mm)	(132 mm)
6″	4.6″	5.8″	6.1″
(150 mm)	(118 mm)	(148 mm)	(155 mm)
8″	6.7″	7.7″	8.2″
(200 mm)	(170 mm)	(196 mm)	(208 mm)
10″	8.3″	9.6″	10.2″
(250 mm)	(211 mm)	(244 mm)	(259 mm)

2

Regulator must be installed in a metallic air duct as pictured above. D represents the regulators maximum outer diameter.

The CAR3 should be installed in accordance with all applicable building and mechanical codes. If installed in a metal duct or duct collar with a flexible duct connector (listed to UL 2043), the CAR3 must be inserted at least 1.2 times the duct diameter from the flexible duct and/or duct connector.

Orient the CAR3 according to the airflow direction indicated on the device. Horizontal or vertical mounting is acceptable.

3

4. MAINTENANCE & WARRANTY

- The CAR3 needs no maintenance when used in normal conditions. The addition of antimicrobial and anti-static additives in the material increases the longevity and reliability of the CAR3. There is no risk of dust deposit or obstruction because the CAR3 has no airways subject to clogging. If the intended application includes air heavily loaded with dust or grease, access to the CAR3 should be possible through the terminal device or with an access panel or door.
- ALDES Ventilation Corporation warrants the CAR3 to be free from manufacturing defects and guarantees the performance within specified limits for a period of seven (7) years when installed in normal environmental air systems for general residential and commercial heating, ventilating and air conditioning. This warranty does not include installation in industrial applications or caustic, noxious or otherwise hazardous airhandling equipment. This warranty is limited to replacement of the product only and does not extend to consequential claims.

5. TROUBLESHOOTING

PROBLEM	CAUSE	SOLUTION	
AIRFLOW TOO LOW	Insufficient duct pressure.	Check fan ratings. Replace fan if too small Increase fan speed.	
	Excessive duct air leakage.	Seal ducts with mastic or tape.	
	CAR3 damper not functioning properly.	Check CFM calibration on CAR3. Adjust to proper airflow value.	
AIRFLOW TOO HIGH AND/ OR NOISY OPERATION	CAR3 too close to fan.	Add manual damper to reduce pressure across CAR3 to normal operating range.	
	Fan at too high a speed.	Lower fan speed.	
	CAR3 damper not functioning properly.	Check CFM calibration on CAR3. Adjust to proper airflow value.
