## **PRODUCT DESCRIPTION**

The ideal in-suite ventilation solution for high-rise construction, the E130-HF delivers exceptional performance in a compact, easy-to-install package only 9-1/4" in height. Easily concealed in a drop-ceiling or soffit, the E130-HF has been thoughtfully engineered for apartments, condos, and all dwellings that use concrete-slab construction. The E130-HF exchanges approximately 106 CFM at 0.20 in.w.g (ESP), enough for even the largest units in multi-family construction.

The E130-HF includes Aldes' exclusive FLEXControl, electronic calibration that eliminates the need for balancing dampers and improves overall efficiency. Cold Supply Air Prevention (CSAP) stops air distribution to the dwelling for 135-minute cycles if the supply air temperature is below freezing, reducing the risk of damage to downstream equipment.

### **KEY FEATURES**

Electronically and independently adjustable supply and exhaust blowers (FLEXControl)

Horizontal configuration for flexible mounting

Drainless for simplified installation

Easy access to core and filters for cleaning

Twist-in collars for easy flex-duct attachment
