ZRT® WITH WIRELESS COMMUNICATION RELAYS

Zone Register Terminals (ZRT®) are available with wireless communication relays that respond to occupancy-based control systems. These solutions are aptly suited for hotels, dormitories, and apartments.

In the example below, the wall-mount supply ZRT® in the living area provides ventilation/make-up air when the space is occupied. The bathroom ZRT® provides on-demand exhaust airflow boost equal to the supply air rate, or higher if desired, and can be activated by the supply ZRT® or local controller.

Wireless communication relays or the room control manufacturer are available from ALDES North America. Relays by Telkonet®, InnCom®, and Magnum Energy Solutions™ only. Contact ALDES North America for more information.
